THE PIONEER AMERICAN SEEDSMAN
Established in 1870

Greetings to the American Farmers and Gardeners for 1943

Reviewing the Past and Looking Forward

Dear Customers and Friends:

A long—long time ago before the advent of the Rubber Tire Buggy—The Bicycle—The Automobile—The Radio—and the Aeroplane—Shumway's Annual Catalog was the Garden Guide that your Mothers and Fathers looked forward anxiously to receiving annually. It was then, as it has always been down through the century, the leading American Seed Catalog. Many who receive this our 73rd Annual Catalog have been customers here for more than half a century.

You younger men and women will remember the joy and satisfaction your parents obtained planting Shumway's Northern Grown, Pedigreed Seeds. Shumway's Motto was then and always has been "Good Seeds Cheap—None Better at Any Price."

Shumway's first Seed Catalog was mailed in 1870. We were still suffering from the effects of the Civil War—times were very hard. Some people thought we would never recover from the effects of the War and that the Nation could not endure. You and I know instead of those predictions coming true we came out of the depression a stronger and better people, and the Nation rose to greater heights than ever dreamed of before. We did likewise in 1873, in 1893, in 1907, and again in 1932.

All during those distressing periods—1873-1893-1907-1932—the house of R. H. Shumway has gone forward Growing Better Seeds and Giving Greater Values for Less Money than any other Seed House on earth. Compare Prices—See for Yourself.

Shumway's first Seed Catalog, published in 1870, was a 16-page book—size 6 x 9, total edition, 4,000 copies. Today this beautiful Catalog has 96 pages—size 10 x 13½—many items featured in natural colors—Garden, Flower and Field Seeds, Hardy Perennials, Ornamental Shrubs, Fruit Trees, Strawberries, Hardy Lilies; in fact "Everything for the Garden." Edition nearly a million copies.

In 1870 when Shumway's first Catalog was issued Rockford had a population of 5,000 people. Today our City boasts of more than 100,000 inhabitants. The great Chicago fire did not occur until the following year—to be exact, October 7th, 1871. Covered Wagons—Horses and Buggies—Mud Roads—Log Cabins—were the things of luxury then. Compare those conditions with today and surely you will agree that this has been a Century of Great Progress.

As we go to press with this our 73rd annual

Catalog, we find the world engulfed by the horrors of war. This is a time when all of us can show our patriotism and love of Country by cheerfully making any sacrifices requested "to the end" that shortly hostilities will cease throughout the world and that a justified Christian peace may be granted to all nations.

Plant A Victory Garden

A modest Garden will afford you fresh Vegetables and Fruit all summer long with sufficient quantity to can and store for winter consumption. This is one very definite way to reduce your living expenses, and at the same time enjoy the world's Finest Fruits and Vegetables fresh from your own Garden.

May we suggest that you and your good wife and family carefully look through the Catalog at your earliest convenience; one writing on the order sheet enclosed the things you need; the other member of your family checking the items in the Catalog so you will have a copy of your order to check against your list when shipment is received. If you should find a shortage or mistake in any of your purchases, feel free to write us promptly.

We are all indeed grateful to Almighty God for his many blessings during those trying years referred to above, and likewise appreciative to you for your valued patronage of many years' standing.

IMPORTANT NOTICE

For nearly three-quarters of a century, Rockford, Illinois, has been recognized throughout the world as the center of mail order Seed, Plant, and Nursery houses. R. H. Shumway was the pioneer in this industry and after being established some twenty years, the firms of H. W. Buckbee, Charlotte M. Haines and Great Northern Seed Company developed as separate institutions in the production of Seeds, Plants and Nursery items. For many, many years these three old reliable houses served millions of American planters.

Recently the allwise Creator called to their heavenly reward Charlotte M. Haines, H. W. Buckbee and the proprietors of the Great Northern Seed Company. Unfortunately there were no sons to carry on these long established companies, so the widows and heirs decided to sell each of the Institutions, and R. H. Shumway, the Pioneer American Seedsman, bought their entire assets and good will.

To all of the Shumway, Buckbee, Haines and Great Northern customers and friends, we send you this copy of our big 1943 illustrated Garden and Farm Catalog and sincerely hope you will find it helpful in making your selections this year for everything you need in Seeds, Plants, Bulbs and Nursery items.

When sending in your orders feel free to write us for any special information pertaining to your Garden and Farming problems.

Yours most sincerely,

R. H. Shumway

Will you please hand to your neighbor or friend who gardens the postal card enclosed so they too may receive a copy of this instructive catalog? Thank you.

GARDEN for DEFENSE—HEALTH and ECONOMY

The words Defense Gardens, Victory Gardens and War Gardens do have a familiar sound. History repeats itself within a generation! Our boys in the armed forces must be well nourished; that goes without saying, so must the many millions of workers in defense factories and other fields of endeavor. All of our allies must be kept supplied with food. A war is being waged on the home front against the specters of hunger and malnutrition.

Plant a Garden this year for Defense, Health, and Economy.

Seeds of victory planted this Spring will yield a bountiful harvest of health, beauty, and contentment such as this old world of ours badly needs at the present time.

In view of the existing conditions, we suggest that all of our customers order as early as possible this year in order to avoid the peak period when stocks of seed may be limited or practically exhausted.

OLD-FASHIONED GARDEN

By Cole Porter

One summer day I chanced to stray
To a garden of flow'rs blooming wild,
It took me once more to the dear days
of yore

And a spot that I loved as a child;
There were the phlox, tall hollyhocks,
Violets perfuming the air,
Frail eglantines, shy columbines
And marigolds everywhere.

It was an old fashioned garden
Just an old fashioned garden
But it carried me back to that dear little
shack

In the land of long ago.
I saw an old fashioned Missus
Getting old fashioned kisses
In that old fashioned garden
From an old fashioned beau.

Dear Customers:

The time has arrived when each and every one of us must use the **highest degree of economy and efficiency** in every operation we make, either on the farm, in the home or in the factory. With this thought in mind I have decided to discontinue the growing and offering of **Onion, Cabbage, Tomato and Pepper Plants**. Experience proves they are not economical for you, as you can purchase seed direct from me and grow your own plants, either in a box of well sifted soil in the house, in a hot bed or in a cold frame you can make out of an old window sash and most everyone has an old window sash around the house. Even if it were not economical to raise your own plants it is far more practical, for in buying plants of me or anybody you just can't have the shipment arrive at the proper time for setting them out. They either get there too early or arrive too late, but if you raise your own, which you can do for one-tenth of what the plants would cost shipped in, you will have them on hand in proper condition to set out in the garden or field the day you want to set them out, and furthermore, if a few plants should die after being reset you still have ample in your hot bed or cold frame to replant where a few died out.

1 Packet each of the four New Charming Annual Flowers illustrated below including Salpiglossis, Howard's Zinnia, Mission Giant Marigold and Zinnia, Pastel Tints. Regular 60c value for 45 cts.

NEW FLOWER CREATIONS

2400 Salpiglossis Silver and Blue Dwarf Giant Flowering

One of the easiest of annuals to grow. The Salpiglossis is rich in deep color tones rare in the floral world, which are set off by veins of silver and blue marking every flower. The blooms of this new type are half again as large as the ordinary varieties. Don't fail to include this outstanding new variety in your flower garden this season. Pkt. 15c; 2 pkts. 25c.

2313 Marigold, Mission Giant Goldsmith

A new and distinct type. Medium height with giant Chrysanthemum blooms 4" to 5" in diameter. Blooms are almost a perfect ball. They remind one of the giant incurved Chrysanthemums. A gorgeous new annual. Pkt. 15c; 2 pkts. 25c.

2505 Zinnia, Super Crown O'Gold, Pastel Tints

A glorious new Zinnia. Flowers are large and showy, 5" to 5½" in diameter with a profusion of stately blooms comprising the choicest Pastel Tints of soft yellow, old gold, light pink, apricot, salmon, white, cream and buff. Plants robust, 3" tall. Bloom all summer. Pkt. 15c; 2 pkts. 25c.

2506 Zinnia, Howard's New Giant Crested Mixed

Strictly a new type developed by crossing the large Dahlia Flowered and Scabiosa types. The blossoms average 4" to 5" in diameter with a full cushiony center surrounded by broad guard petals after the style of a Pyrethrum Roseum. This new Zinnia contains almost all known colors and shades such as orange, scarlet, yellow, rose, maize and crimson. Pkt. 15c; 2 pkts. 25c.

Don't Miss These 8 Outstanding Novelties

2037 Alyssum, Violet Queen One of the most charming new introductions. Everybody is eager about it. Plants are dwarf, compact, neat in habit, free flowering, and the small sweetly scented flowers are a very rich, deep shade of violet. Violet Queen will unquestionably be one of the leading novelties of the season. Pkt. 15c.

2359 Petunia, Hollywood Star. This variety is a charming shade of rich rose with an amber throat. It is unique in the form of its flower, which consists of a five-pointed star. Vigorous grower, early and free flowering. Pkt. 15c.

2480 Verbena, Hybrida Brightness. A distinct new variety with particularly vivid color, a bright rosy, cerise scarlet, boldly contrasted with the rich white eye. Individual florets are ½" in diameter, while the flower heads measure 2¾" across. Plants are semi-compact in habit. Makes an excellent variety for borders or edging. Pkt. 15c.

2367 Poppy, Iceland, Pastel Tints. This special strain of the famous Iceland Poppy contains a well balanced mixture of the choicest pastel tints. The plant is vigorous and hardy. Sow seed early and you will be awarded with a profusion of gorgeous blooms on long stately stems all summer long. Pkt. 15c.

2261 Lavender or Lavendula. A lovely fragrant perennial producing lavender-blue flowers, largely used when dry to place in linen closets to impart their perfumes to the linen and for sachet bags. This item has been quite scarce of recent years but we are fortunate in being able to offer it again to you this season. Pkt. 15c.

2361 Petunia, Miniature Violet Gem. The plants are neat, dwarf and compact. The blooms are just the size you would expect to find on this type of plant, free blooming, almost to a fault, because throughout the season the rich violet-blue blooms are so plentiful that they all but completely hide the clean, dark green foliage. Pkt. 15c.

2366 Phlox, Gigantea Rosy Morn. This new variety produces blooms larger than a half dollar. Color, combination of rose-pink with white eye. Makes a glorious bedding variety. Pkt. 15c.

2254 Larkspur, Empress, Shell Pink. No other annual flower will give you more bloom with less care and attention than this new improved large flowered Empress or Shell Pink variety. Attractive flower spikes 3' to 4' tall, which stand upright, close to the center stalk. We consider this the outstanding Shell Pink Larkspur in cultivation. Pkt. 15c.

Any 2 of the above 8 only 25c

2271 Lupins—New Russell Sensational Perennial

These remarkable new Lupins are the result of continuous labor for many years. The spikes of bloom are often 3½ feet and more in length. Flowers are fan-shaped, the standard being expanded like that of a Sweet Pea. The coloring has an immense range and unique character. Received Gold Medal Award by R. H. S. in 1937. Thrives on sandy or light wood soil where water can be supplied. Their tall spikes of bloom present a delightful variety of color blending from June to September. It is advisable to either chip the seed or soak them in water at least 48 hours before planting. Pkt., 25 Seeds, 25 cts.; 2 Pkts., 40 cts.

Specialties for the Garden that Everybody Should Plant Shumway's Superior Asparagus

Biggest Money Making Vegetable Crop—Start Your Plantings This Spring

Culture

Well-drained soil and a southern exposure produce the earliest and best crops of Asparagus. For small plantings we recommend the use of roots because they will give quicker returns. It is best not to cut the one-year-old roots until the second year after planting; the two-year-old roots will produce a limited crop the following spring after they have been set out. One oz. of seed will sow 40 ft. of row. 2 lbs., are needed to produce enough roots to set out one acre. Plant Asparagus in fertile soil and keep the crop cultivated throughout the season. For home garden, 100 roots will plant a row 100 ft. long, producing sufficient quantity for family of five.

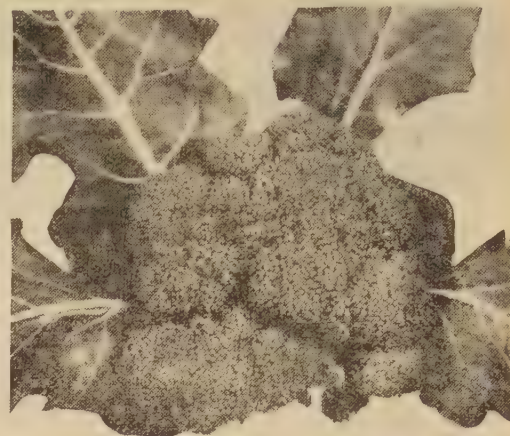

158 Mary Washington The Most Reliable Rust-Proof Asparagus

This variety of Asparagus is so superior to all other varieties that it has completely replaced them, both in the home garden and for market. It originated and was selected by the United States Department of Agriculture, Washington, D. C. The plants form large clean shoots which are thick and heavy. They are long and straight, with closely folded tips. The color is a rich dark green with still deeper green tips. It is a heavy yielder and a long-lived producer of exceptionally fine quality. It has proved to be practically rust-free. Pkt. 10 cts.; oz. 18 cts.; ¼ lb., 33c; ½ lb., 50 cts.; lb., 90 cts., postpaid.

2 Year Old Asparagus Roots

266 Broccoli

Italian Green Sprouting

It forms a rather loose head made up of flower buds. The plants branch freely and each branch terminates in a head or bud cluster. The center heads are cut first and as the side shoots develop they are cut with about 6 inches of stem and bunched for market. Frequently 5 and 6 cuttings are made from one plant. Large heads of bright green, tender sprouts, which are cooked like Spinach or Brussels Sprouts and have a most delectable flavor, even milder and more palatable than that of Cauliflower. Sow the seed in May and harvest in August. I have a very remarkable strain of this vegetable which has become a great favorite. Pkt., 15 cts.; ½ oz., 30 cts.; oz., 50 cts.; ¼ lb., \$1.75, postpaid.

155 Artichoke Large Green Globe

A delicious vegetable which is cultivated for its large flowerheads, which are cooked like Asparagus. It is considered a delicacy and demands a high price in all better city markets. The plant is a perennial and when set in good soil and given slight winter protection of leaves or straw, will remain in bearing several years, but for best results it should be renewed every two or three years. Pkt., 25 cts.; ½ oz., 58 cts.; oz., 95 cts., postpaid.

410 Dandelion

Improved Thick-Leaved

Increasing sales with every year are a sure indication that this delicious vegetable—a relative to our common Dandelion—is becoming more and more popular with gardeners everywhere. Rich soil is needed where a heavy crop is wanted. The leaves are offered in the market either green for boiling or blanched to be eaten like Endive. Pkt., 25 cts.; oz., 70 cts.; ¼ lb., \$2.15, postpaid.

341 Corn Salad or Fetticus

Large Leaved Round

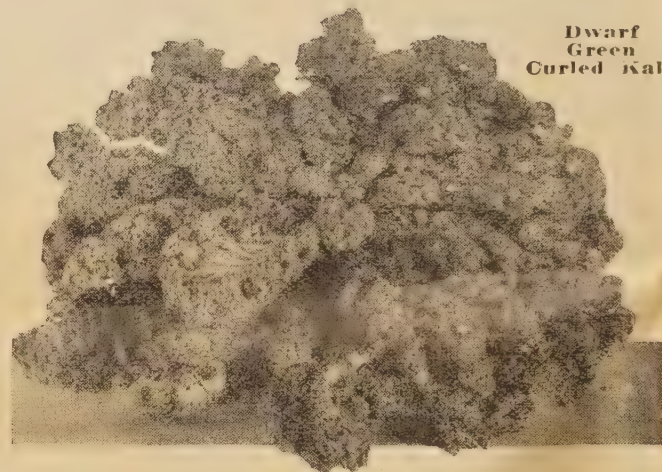

An excellent and valuable vegetable for salads; can be had continuously by successive sowings. Late sowings may be covered with straw in winter for early use in the spring. In some sections of the country it is used in place of lettuce for winter use. Import Item—Not obtainable.

340 Collards Georgia or Southern Creole

Georgia Collards

A tall cabbage-like, loose-leaved plant which stands cold weather or adverse conditions very well and will grow on land which is too poor for a crop of cabbage. Most Southern gardeners will not be without it. Often called "Cabbage Bunch." Grows 2 to 3 feet high and forms large, loose, open heads. The quality is improved by frost, if not too severe. Pkt., 10 cts.; oz., 15 cts.; ¼ lb., 35 cts.; ½ lb., 55 cts.; lb., \$1.00, postpaid.

Dwarf Green Curled Kale

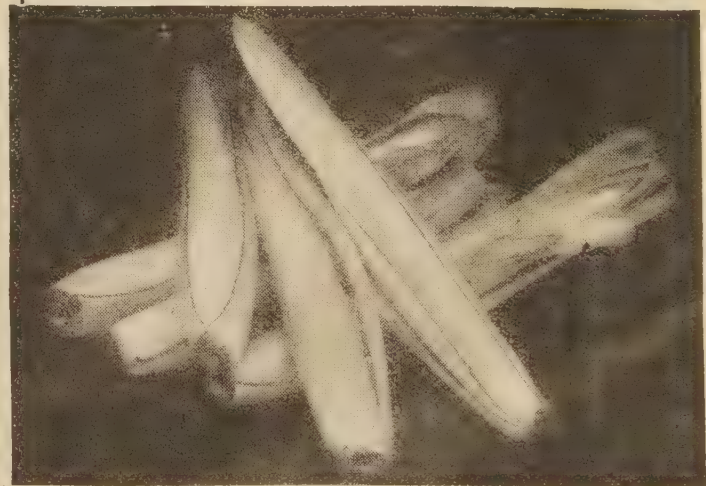

Borecole or Kale

Sow the seed from early spring until the middle of August. The early sowings give fully grown plants, whereas the later sowings will furnish excellent small tender leaves. One ounce sows 500 feet of drill.

462 Dwarf Green Curled. The plants of this variety are hardy when the temperature does not go below zero. A heavy frost or freezing improves this delightful green. Leaves are large, curled and fringed, bright green in color. The plants are of even dwarf growth. Pkt., 15 cts.; oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00, postpaid.

463 Siberian or Sprouts Curled. This variety is very similar to the Dwarf Scotch except that it is not as curled. It makes excellent greens at almost any season of the year. Pkt., 10 cts.; oz., 17 cts.; ¼ lb., 45 cts.; ½ lb., 70 cts.; lb., \$1.25, postpaid.

464 Tall Green Curled Scotch. Very much like the Dwarf Curled Scotch except that it has a spreading habit and the stalk holds the leaves well up off of the ground. Pkt., 15 cts.; oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00, postpaid.

338 Chicory

Witloof or French Endive. This splendid vegetable gives every gardener a chance to grow his own winter salad without the use of a greenhouse, since the roots can easily be forced in the cellar during the winter. To grow the roots, sow the seed in the open not later than June 1 and lift them in the fall. For forcing, dig them and pack closely together in boxes and cover with 6 in. of sand, light earth, peat moss or sawdust. Water them and place near the heater to keep warm. When the sprouts break through the surface they are ready for the table. They are delicious served with French dressing. Pkt., 15 cts.; oz., 50 cts.; ¼ lb., \$1.50, postpaid.

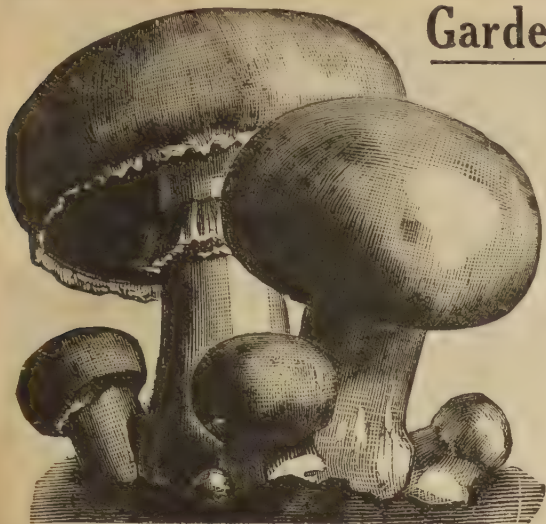

Brussels Sprouts

267 Long Island Improved.

A variety of the Cabbage family, possessing the peculiarity of bearing upon its stem or stalk from 50 to 100 small, compact round heads, each measuring from 1 to 2 inches in diameter. These heads are cut off when well formed and are usually marketed in quart berry boxes. The plants are very hardy, are not injured but improved by frosts. Pkt., 15 cts.; oz., 70 cts.; ¼ lb., \$2.15; ½ lb., \$4.15; lb., \$7.95, postpaid.

It is gaining in popularity every year because its dwarf growth and its great productiveness make it ideally suited to the small home garden as well as to the large acreage of the market gardener. Its strong erect growth keeps the pods off the ground so that they are not injured by wind or rain, thus avoiding rust and rot. The pods, which are produced in clusters, contain 4 or 5 large, fat beans of the finest quality, packed so closely together that they are very easily shelled. The beans are always tender, juicy, and sweet, and may be used green or dried. Either way they are rich and buttery, having the real lima bean flavor. Medium early. Ready for table use in 75 days. Pkt., 10 cts.; $\frac{1}{2}$ lb., 28 cts.; lb., 50 cts.; 2 lbs., 90 cts.; 5 lbs., \$2.00, postpaid.

225 Shumway's Early Giant Bush Lima

The largest podded bush lima bean. A true bush type growing $1\frac{1}{2}$ ft. in height, very rugged and upright in growth. It is as easily grown as snap beans and will bear from July until taken by frost. A fine yielder of pods 5 to 6 inches long, containing beans as large as the largest pole lima variety. It is a tender, rich and buttery-flavored variety, the thick pods holding the flavor well. Those who enjoy lima beans should not fail to grow this variety. Pkt., 12 cts.; $\frac{1}{2}$ lb., 30 cts.; lb., 50 cts.; 2 lbs., 90 cts.; 5 lbs., \$2.00, postpaid. See Color Illustration Front Cover.

Fresh Lima Beans are Delicious Plant Some This Year

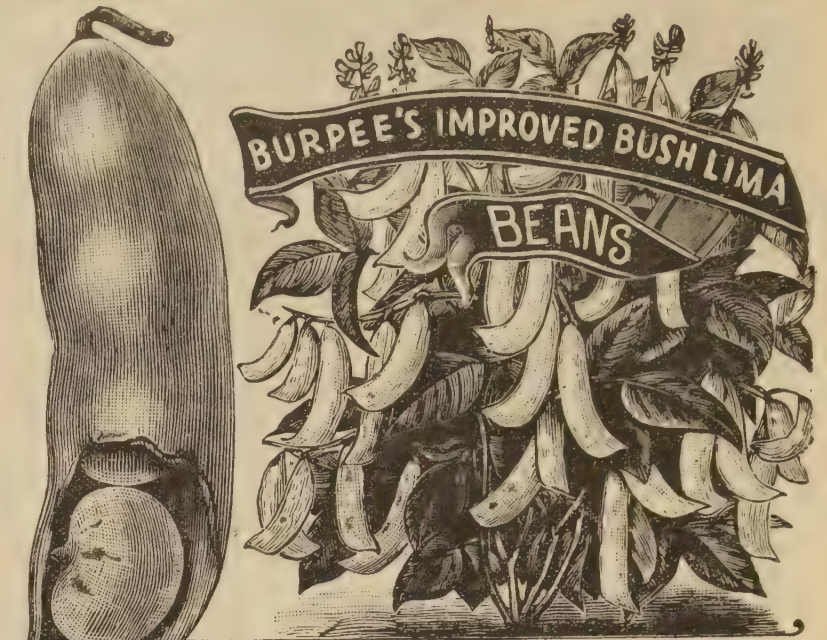

Limas are tender and should not be planted until all danger of frost is passed. On Dwarf varieties make rows 2 to 3 feet apart, and plant Beans on edge with eye down every 6 to 8 inches. Pkt., 10 cts.; $\frac{1}{2}$ lb., 24 cts.; lb., 40 cts.; 2 lbs., 70 cts., postpaid.

Mangels and Sugar Beet

260 Mangel, Shumway's Colossal Giant

The Largest Yielding Variety I Have Ever Seen

1 Oz. of Seed Will Plant a Row 100 Ft. Long. 7 Lbs. of Seed to Sow One Acre

With the extremely low prices of grain, all farmers should grow at least a liberal acreage of my wonderful Colossal Giant Mangel. Mangels and Sugar Beets will grow and produce a crop on any fair Corn land. Root crops for cattle feeding are equal to grain pound for pound and are produced at half the cost. The value of Mangels for stock feeding is very important. They improve their health and condition. For milk cows they increase the flow of milk and are relished by all animals. My Colossal Giant is the most popular. The roots are of enormous size, very uniform in shape, smooth and clean. Skin is bright, rich red; flesh is white, tinted with rose. Easily harvested as roots grow one-half to two-thirds out of the ground and frequently 2 feet or more in length. The immense yield of 35 to 50 tons per acre, under favorable conditions, is not unusual. Oz., 20 cts.; $\frac{1}{4}$ lb., 50 cts.; $\frac{1}{2}$ lb., 80 cts.; lb., \$1.50; 2 lbs., \$2.85; 5 lbs., \$6.25, postpaid.

258 Giant Half Sugar Rose Top

A Cross Between Mangel and Sugar Beet—A Great Yielder

This magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of much higher nutritive value, the roots for feeding purposes being really more valuable, pound for pound, than those of the very best strains of Sugar Beet, and the yield under equally favorable conditions being more than double. The roots grow partly out of the ground, and because of this the crop can be harvested and stored at less expense than most any other root crop. We are certain that every one who plants this variety and grows it with care will be much pleased with the crop. Roots are of oval shape, green above the ground and white below; flesh white and sweet. Extensively used for stock feeding. It is a heavy cropper. Oz., 15 cts.; $\frac{1}{4}$ lb., 40 cts.; $\frac{1}{2}$ lb., 70 cts.; lb., \$1.25; 2 lbs., \$2.40; 5 lbs., \$5.50, postpaid.

Field Carrots are of high nutritive value; also a great tonic, keeping the stock in good condition. Horses are especially fond of them and in a good many stables, horses are fed carrots once a day. 320 Shumway's Super Snowball. This wonderful strain of Cauliflower is the particular variety that the market gardeners have wanted for some time. Its extreme earliness, about 7 days earlier than Early Snowball, and uniformity of heading will excel the others for early marketing. Before the foliage is full grown and the heads have begun to appear the inside leaves begin to curl and twist forming a protection. The outside foliage is strong and vigorous. This strain heads up evenly throughout the field, which no other Cauliflower is known to do. The heads are decidedly larger, deeper and more solid than the other varieties. Pkt., 25 cts.; ¼ oz., \$1.00; ½ oz., \$1.75; oz., \$3.25; ¼ lb., \$9.75; ½ lb., \$19.00; lb., \$36.00, postpaid.

ATTENTION

Our altitude is a mile high and my Cauliflower grew just as good for me here this year as it did when I was back in New York state. You know I had both of your Snowballs and I like the two of them. Yours truly, Denver, Colo. FRANK G. ATKINS.

Extra Early Dwarf Erfurt 321 Extra Early Dwarf Erfurt. Ready for market in 55 days after transplanting. A very satisfactory early variety. Plants are short-stemmed, of the dwarf type. Heads are white and of medium size, with a full, even shape and firm fine texture. This stock is equally desirable for forcing under glass and for planting in the open ground. Pkt., 20 cts.; ¼ oz., 85 cts.; ½ oz., \$1.50; oz., \$2.75; ¼ lb., \$8.25; ½ lb., \$16.00; lb., \$30.00, postpaid.

413

New York Purple

My strain is unexcelled—big money maker. The standard variety for market gardeners and shippers. Very profitable on account of its extremely heavy yield. The plants are dwarf, wide-spreading and strong, each one producing from 4 to 10 fine large oval fruits during the season. The color is dark purple, the skin smooth and the flesh of good quality, solid and meaty. Pkt., 12 cts.; oz., 50 cts.; ¼ lb., \$1.35; ½ lb., \$2.45; lb., \$4.50; 2 lbs., \$8.75, postpaid.

Endive Green Curled

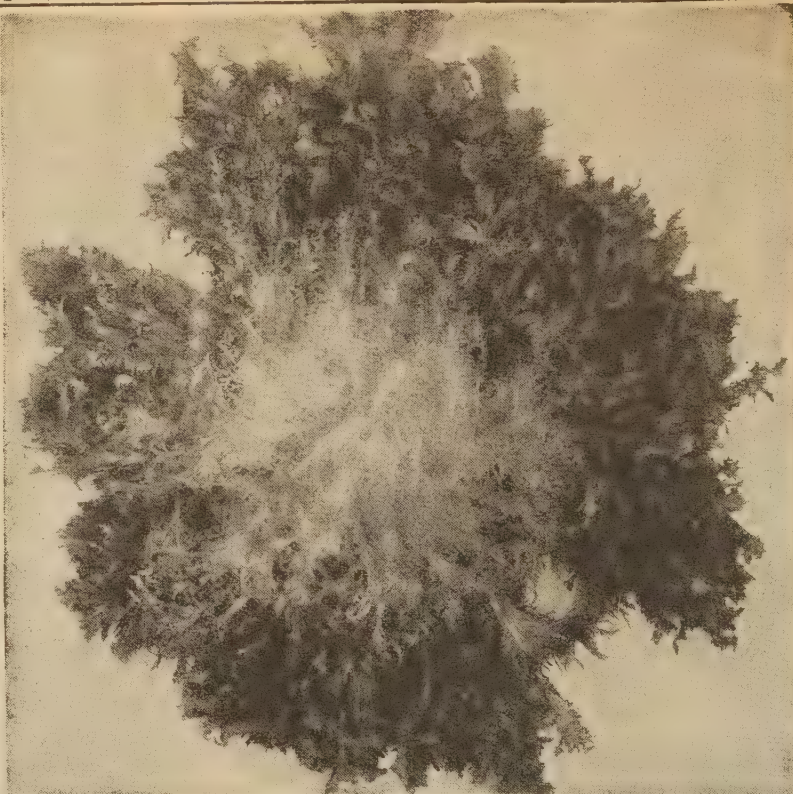

417 Endive, Green Curled. The "Chicoree Frisee" of the French. Sometimes called Moss Curled or Green Fringed Oyster. Pkt., 10 cts.; oz., 22 cts.; ¼ lb., 60 cts.; ½ lb., \$1.00; lb., \$1.75; 2 lbs., \$3.25, postpaid.

Endive White Curled

Endive Broad Leaf Batavian Escarolle

416 Endive, Broad Leaved Batavian (Escarolle). This endive, which is larger than other sorts, is unsurpassed for salads. Its broad, thick, fleshy leaves are twisted and waved, bright green in color, and have midribs nearly white. The inner leaves form a fairly solid head which blanches to a deep creamy white. Extremely crisp and tender and of most agreeable flavor. Often served boiled like spinach. Pkt., 10 cts.; oz., 22 cts.; ¼ lb., 60 cts.; ½ lb., \$1.00; lb., \$1.75; 2 lbs., \$3.25, postpaid.

EGG PLANT

412 Shumway's Black Beauty Egg Plant

Shumway's Black Beauty

412 Egg Plant, Shumway's Black Beauty. Without question the earliest and best of the large fruited types. The fruits are larger, egg-shaped, symmetrical, with a dark purplish-black luster. The skin is spineless and smooth. The fruits preserve their color and freshness a long time. A vigorous grower, producing under favorable conditions uniformly large fruit right through until frost. The best adapted type for the northern states because of its earliness. Superb appearance, size and quality make it the prize type for fancy vegetable markets. Average weight 2 to 3 pounds. Pkt., 15 cts.; oz., 55 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; lb., \$5.00; 2 lbs., \$9.75, postpaid.

Garlic Bulbs Easy to Grow

423 Garlic Bulbs or Sets. I recommend you try these this year. A bulbous root of the onion type, esteemed for flavoring soups, stews, etc. The bulbs or sets are composed of several parts, which should be divided and planted in rows 1 foot apart, 4 inches apart in

the rows and one inch deep. When the tops turn yellow take up and dry in the shade. ½ lb., 22 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50, postpaid.

Tall Golden Self Blanching

329 Celery, Shumway's Superior Golden Self Blanching Tall. The best tall growing variety in our trials. The distinctive feature of this wonderful variety is that it is literally self blanching. It is a favorite with both market gardeners and the home planters. The plants grow 20 to 22 in. tall. They are remarkably solid and ready for the table in about 110 days. Though it is essentially an early variety it will store quite well until about Christmas or New Year's Day. The foliage of the growing plants is a greenish yellow, but when blanched it is an appealing waxy yellow color. The thick solid stalks blanch to a beautiful golden yellow. They are extremely solid, free from strings, and have a remarkably rich nutty flavor. Pkt., 15 cts.; oz., 60 cts.; ¼ lb., \$1.75; ½ lb., \$3.25; lb., \$5.50, postpaid.

CELERY—1 ounce of seed will produce 4,000 plants
Shumway's Superior Varieties for Home or Market

Golden Plume

325 Shumway's Perfected Golden Plume or Wonderful. "The earliest of all" is what my customers say. A new type developed from the famous Golden Self Blanching Celery. The plants are semi-dwarf and have thicker stalks than those of the original Golden Self Blanching. The heart is thick and full and the stalks are wider and thicker. When blanched the stalks are a beautiful light golden yellow which suggests their choice quality. The flavor is distinctly nutty and rich. Golden Plume or Wonderful has exhibited a decided resistance to blight and rust. This feature is bound to appeal to many growers who have been troubled with these handicaps in other varieties. Pkt., 15 cts.; oz., 60 cts.; ¼ lb., \$1.75; ½ lb., \$3.25; lb., \$5.50; postpaid.

Florida Golden

332 Florida Golden. A magnificent new early variety. Enjoys characteristics of the Golden Plume or Wonderful but is of greater height and weight, grows 18 to 20 in. tall and the edible portion of the stem is larger. Hearts blanch a rich cream-color of exceptionally fine quality. The stems are brittle, crisp and free of strings. Carefully bred for high quality and shows less tendency to produce premature seed-stalks than other strains. Be sure to try this grand variety this year. You will be delighted with your results. Pkt., 20 cts.; oz., 65 cts.; ¼ lb., \$2.00; ½ lb., \$3.75; lb., \$7.00, postpaid.

Celeriac—Plant Some

331 Celeriac, Turnip Rooted Celery, Large Smooth Prague. A root vegetable obtained from celery by selective breeding. The root, which is the edible part, is turnip-shaped. Large Smooth Prague is the best improved strain with large well formed roots; smooth and with few root-lets. Imparts an excellent celery flavor to stew or soup. Delicious when boiled and sliced cold for salad. Keeps well for winter, especially if packed in damp sand or placed in pits like turnips or carrots. Pkt., 15 cts.; oz., 60 cts.; ¼ lb., \$1.75, postpaid.

Easy Blanching Celery

330 Shumway's Easy Blanching. When put away green remains crisp and firm longer than any other sort. The heavy stalks are stocky in growth and of medium height, are the easiest and quickest to blanch and keep better in the trench than other sorts. The tender, brittle, sweet, nutty flavored stalks are attractive in appearance. Ready for the table or market in about 115 days. Pkt., 10 cts.; oz., 45 cts.; ¼ lb., \$1.25; ½ lb., \$2.25; lb., \$4.25, postpaid.

328 Pure white—delicious flavor—crisp and succulent. This magnificent celery is improving from year to year under high culture and careful selection. It is a truly beautiful type. The entire plant blanches perfectly white. This makes the White Plume celery one of the most showy ornaments that can be put upon the Thanksgiving or Christmas dinner table. As to succulence, crispness and quality, White Plume is all that can be desired. Fit to eat in 110 days. Very valuable for early fall and winter use. Pkt., 10 cts.; oz., 45 cts.; ¼ lb., \$1.25; ½ lb., \$2.25; lb., \$4.25, postpaid.

327 One of the best long-keeping sorts. Matures late. Unquestionably the finest sort for winter use at home and for the near-by markets. Too brittle for shipping. Stalks very large, thick, solid and of splendid quality. It blanches quickly and easily to a beautiful creamy yellow. A selection from Golden Self-Blanching, inheriting its good qualities with the added advantage of keeping better. Extremely large hearts; rich, nutty flavor. Pkt., 10 cts.; oz., 45 cts.; ¼ lb., \$1.25; ½ lb., \$2.25; lb., \$4.25, postpaid.

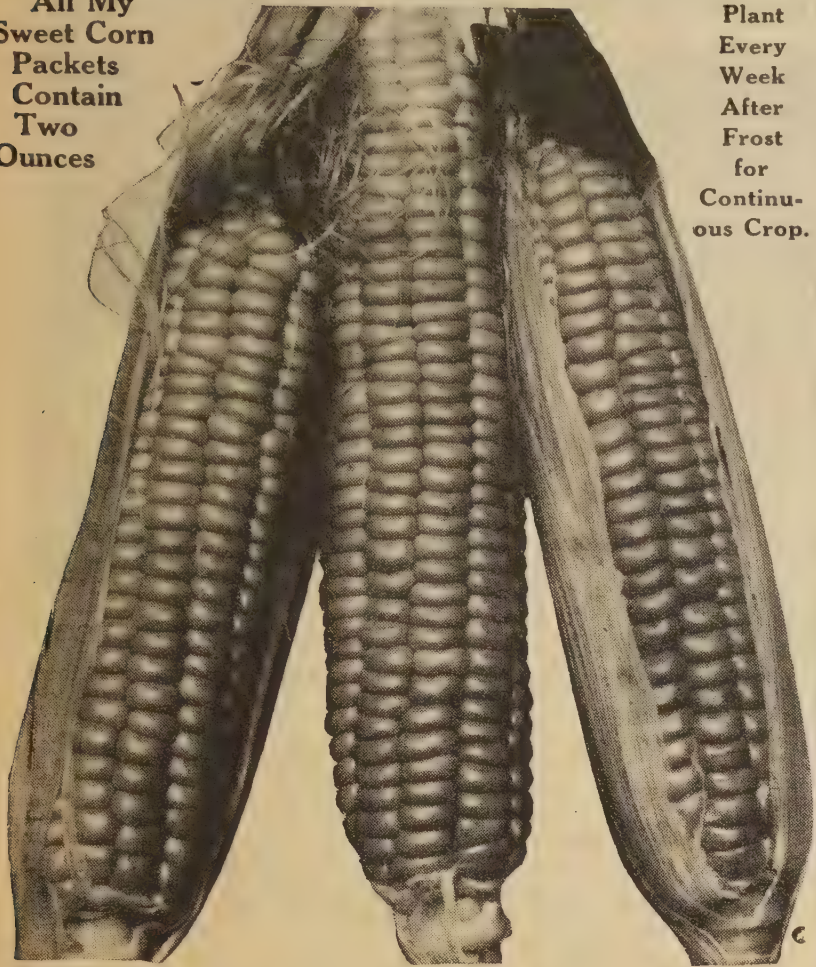

DWARF STRAIN

326 Shumway's Superior Golden Self-Blanching Dwarf. Very early—stalks thick—crisp and brittle—waxy yellow. An outstanding yellow type, standard for market and shipping. Plants are of medium growth, 20 to 24 inches tall, and very stocky. Leaves are yellow-green and stalks blanch readily, with little earthing up, to a golden ivory. The stalks are thick and heavy, but their flesh is brittle and tender without stringiness; the flavor is sweet and nut-like. The thick heart forms early and a large part of the plant is edible. Ready for use early in September. Considered one of the best table varieties. Pkt., 15 cts.; oz., 60 cts.; ¼ lb., \$1.75; ½ lb., \$3.25; lb., \$5.50, postpaid.

351 Shumway's Improved Golden Bantam

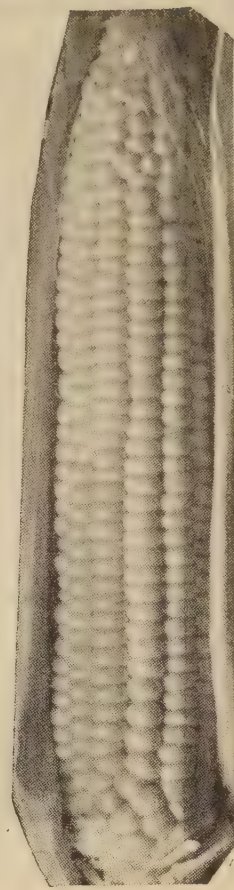

Extra Select Pure Bred Seed

Very popular early Sweet Corn. The standard of the yellow varieties. The ears are very uniform, 6 to 7 inches long with 8 rows. The kernels are broad and evenly set, rich golden yellow in color, tender, sweet and palatable. Somewhat dwarf in habit, the plants measure only about 4½ to 5 feet in height, usually yield two ears to the stalk. A sure cropper, very productive and equally valuable for home or market garden. Ready for use in 75 days. Pkt., 10 cts.; ½ lb., 23 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50 postpaid.

359 Howling Mob

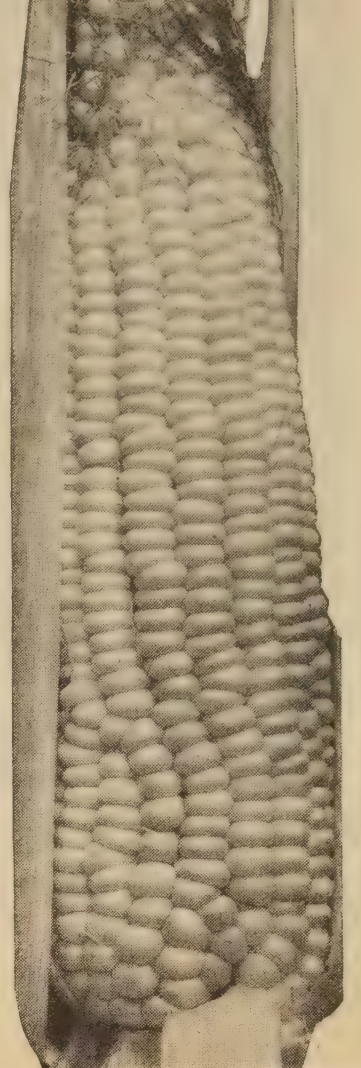

Ready for table in 85 days. The finest early midseason Sweet Corn ever introduced. It is vigorous and productive, with ears 7 to 9 in. long, closely set with 12 or 14 rows of beautiful pearly white grains. The kernels are arranged neatly in straight rows which give them a particularly attractive appearance and make it easy to eat from the cob. The kernels are deep and contain a large quantity of delicious sweet pulp beneath the thin tender skin. Pkt., 10 cts.; ½ lb., 23 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50, postpaid.

358

Shumway's Extra Early Market Gardeners

An outstanding, luscious, early strain of sweet corn. An exceptional variety for market gardeners as the name implies. The kernels are silvery-white and extremely sweet. It remains in table quality for a considerable period, which makes it particularly profitable. In this variety I consider we have one of the best varieties of sweet corn offered. Ready for table in 65 days. Pkt., 10 cts.; ½ lb., 23 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50, postpaid.

363 Early Evergreen

A selected strain of Stowell's Evergreen bred for earliness. It will produce edible ears a week to ten days earlier than the Stowell's Evergreen. For this reason it is a valuable market sort providing a succession to the second early types. In other respects its qualities are practically identical with Stowell's; ears 7½ inches long; 12 to 14 rows; deep white luscious kernels, remaining in table condition a long time. Ready for table in 80 to 85 days. A favorite in northern, cooler localities. Pkt., 10 cts.; ½ lb., 23 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50, postpaid.

370 Shumway's New Golden Gem

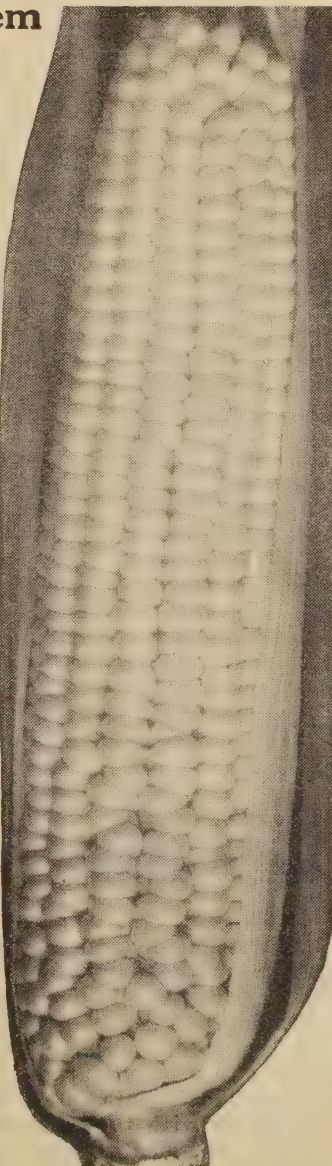

An entirely new variety developed by the North Dakota Experiment Station and the earliest yellow sweet corn on the market, producing ears in 67 days. The ear is about the same size as Sunshine, but has only 8 to 10 rows. Quality, tenderness and sweet flavor are unsurpassed. The plant is exceedingly short, but vigorous and productive and certain to be a great favorite. Pkt., 10 cts.; ½ lb., 25 cts.; lb., 45 cts.; 2 lbs., 80 cts.; 5 lbs., \$1.75, postpaid.

367 Shumway's Early Golden Market

One of the later introductions in early Sweet Corn maturing marketable crop in 70 days from time of planting. Ears 8 inches long, 10 to 12 rowed, fine grained, delicious flavor, stalks 4½ feet high. I consider this the leader by far of all early yellow varieties of Sweet Corn. A sure money maker for market gardeners where a matter of 5 to 10 days in marketing a crop makes a tremendous difference in the value per dozen or 100 ears. Pkt., 10 cts.; ½ lb., 23 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50, postpaid.

368 Shumway's Vanguard

A superb second early sort. An improved howling mob. Ready for table in 80 days. The robust plants, 4½ to 5 feet tall, produce large ears, usually two, 7 to 7½ inches long, with 12 rows of medium-sized deep-set grains, pearly-white, tender, juicy and deliciously sweet. No other type can surpass it in flavor. It is a favorite trucker's variety because it combines large size with high quality, thereby dominating many markets. Also desirable for the home garden. Pkt., 10 cts.; ½ lb., 23 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50, postpaid.

369 Whipple's Early White

SPECIAL LOW PRICES
to Market Gardeners

369 Whipple's Early White

A grand early white corn. The ears have 16-20 rows of deep rather narrow kernels and are of very fine quality. The ears are 8-9 inches long and large around. They look like well bred Evergreen yet they mature two to three weeks earlier. Market gardeners find that the size, high yield (there are often two good ears on a stalk) and earliness make this a very profitable kind to grow for markets where a white corn is wanted. Ready for use in 80 days. Pkt., 10 cts.; ½ lb., 23 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50, postpaid.

350 Golden Sunshine

Ready in 68 days. A quite new, remarkably fine, extra early variety originated through selective breeding by Professor A. F. Yeager of the North Dakota Experiment Station. It is earlier than Golden Bantam and stays in table quality for a greater length of time. The ear is about one inch longer and has 10 to 12 rows instead of 8. The kernels are sweeter, more tender and a lighter yellow in color. The plant is taller and more vigorous. Because of its earlier maturity, longer season and superior quality, it brings better prices than the Bantam and is displacing the latter in many markets. Pkt., 10 cts.; ½ lb., 23 cts.; lb., 40 cts.; 2 lbs., 70 cts.; 5 lbs., \$1.50, postpaid.

GREEN PROLIFIC CUCUMBER

395—55 days. "Sometimes known as Boston Pickling." Of good quality and fit for slicing, but because of its small size, 5 by 2½ inches, it is more popular for pickling. It produces early and yields a large and continuous crop if vines are kept plucked. The fruits are bright green, smooth, uniform and square-ended. Excellent for early pickles. Pkt., 10 cts.; oz., 20 cts.; ¼ lb., 60 cts.; ½ lb., \$1.00; 1 lb., \$1.75; 2 lbs., \$3.25; 5 lbs., \$7.50, postpaid.

391 Longfellow "The Largest of All and One of the Best"

72 days. Unquestionably the finest of the large white-spined varieties. It is long, 12 to 15 inches, slender and round-ended. The fruit, dotted with white spines, is a uniform dark green. Because of its length and weight it takes the form of the soil beneath; so to secure perfectly straight specimens it is necessary to smooth out the ground under the growing fruit. The flesh is firm and of good quality with few seeds; excellent for slicing. This variety is equally suitable for green-house forcing or field culture. The large, uniform size, handsome appearance and good quality make it a profitable type for the fancy trade. A good shipper. Reading, Penna.
Dear Mr. Shumway:
My father has bought all his seed from you for over twenty years. He was so well pleased with them that he asked me to continue buying for the old farm from the house of Shumway as he has passed on to his reward. You will remember I did the buying last year in my name, and am just as well satisfied with your seed as father was. Be sure to send your catalog early. I wish you could have seen our garden. The neighbors were so well pleased with it. I am sure you will get more orders from here.

NOTICE

New Orleans, La.
Dear Sir:
Your Seed book came too late for me this spring and I had bought part of my seed from another seed house. I now wish I had waited for yours as my first sowing was not good. My Carrots from your seed were the best I ever grew and a big crop too. I thought I would never get all my Beans picked but I did, and my wife canned over 100 quarts. Your Cabbage was good too. Every plant made a good head. I could write you more about other things but I guess you know yourself. Be sure to send catalog early next time. Yours truly,

798 BUCKBEE'S NEW TOMATO ABRAHAM LINCOLN

BUCKBEE'S ABRAHAM LINCOLN

World Beating TOMATO

This famous Tomato was originated on Buckbee's Rockford Seed Farms and named in honor of Illinois' greatest son, Abraham Lincoln. This giant Tomato was first introduced by H. W. Buckbee in 1923 and is the largest Tomato we have ever grown. We have had as many as 9 Tomatoes in a single cluster with a total weight of 7 pounds; the average weight however is about a pound, but customers have reported producing single fruits weighing nearly 3 pounds. Color, beautiful dark red fruits, extra heavy, large, sweet, solid and meaty, with very few seeds, and for so large a Tomato it is remarkably smooth and free from cracks and seams.

The
Giant
of
All

Tomatoes

Abraham Lincoln Tomato, while unusually large, ripens all the way through the fruit, making it an ideal variety for Catsup, Chilli Sauce, Tomato Juice, and slicing. It is a very shy seeder; therefore the flesh is firm and meaty.

The plant is a sturdy, healthy grower with distinctive bronzy green foliage; it ripens the first fruit immediately following the ones of the first sort, and continues bearing from that time until the plant is killed by frost. This variety was originated on H. W. Buckbee's Seed Farm in Rockford, Illinois, and in the recent purchase of the "Buckbee" business we secured the original stock seed, and offer same to you as long as supply remains unsold, at the following special prices: Catalog No. 798—Pkt., 25 cts.; 5 pkts., \$1.00; 1/4 oz., \$1.25; 1/2 oz., \$2.00; oz., \$3.50, postpaid.

Mrs. H. R. Cusil, Henderson, Ky.—Your Abraham Lincoln Tomatoes are superfine. Had clusters of 6 to 10 fruits that averaged over 1 1/4 lb. each.

Geo. Lintz, Alton, Ill.—I raised 5 Abraham Lincoln Tomatoes in one cluster that weighed 11 1/2 lbs. Every one was as smooth as an apple.

Every GARDENER Should Know

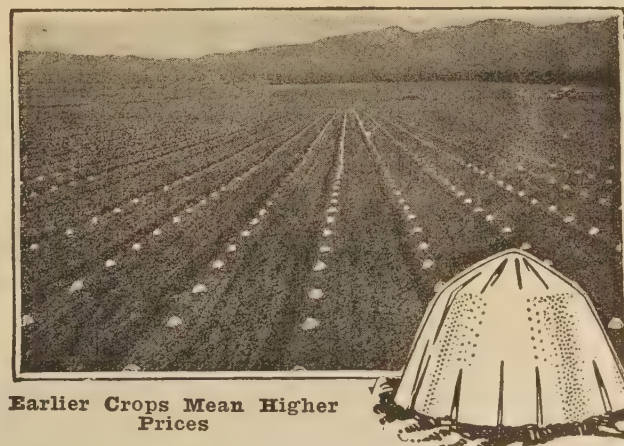

That Peas, Beans, Sweet Peas and Lupines belong to the Legume family—plants that bear their seed in a pod—like clover and alfalfa. All legumes form a partnership at the roots with certain kinds of helpful bacteria called Legume Germs, that are able to pump or draw nitrogen from the air and give it to the plant. They form on the roots in colonies, looking like lumps called nodules, which are really nitrogen storehouses.

Without these germs, legumes would rob the soil of nourishment and have a sickly growth. Few soils contain a natural supply of these beneficial organisms. It is therefore necessary to "inoculate"—apply these nitrogen-gathering germs directly to the seed before planting. All Agriculturists recommend inoculation for legumes.

NITRAGIN is a granular MOIST soil-like culture, packed in tins. Easy to apply. Directions on every can. Prices for NITRAGIN Bacteria Culture listed below. Postpaid.

Shumway's Superior Lawn Grass Seed for Homes and Golf Courses

One of the many Beautiful Lawns Produced from Shumway's Lawn Seed

1605 Shumway's Forest City Shady Place Lawn Seed

Getting an attractive lawn under trees or in between apartment buildings has been a problem with many home owners but this Forest City Shady Place Mixture will solve your difficulty. It is a combination of fine, dwarf growing, evergreen varieties, which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour," and if the drainage is defective it is apt to be covered with moss and coarse Grasses. In such cases an application of slaked lime, at the rate of one hundred pounds to each thousand square feet, or two tons to the acre, is an excellent corrective and sweetener, but the moss should be first raked off. Sow seed at the rate of 1 lb. for 200 sq. ft., 5 lbs. for 1,000 sq. ft. **Postpaid, ½ lb., 30 cts.; 1 lb., 55 cts.; 3 lbs., \$1.55; 5 lbs., \$2.50.** Not Prepaid, 10 lbs., \$4.25; 25 lbs., \$10.00; 50 lbs., \$19.50; 100 lbs., \$38.00; 200 lbs. and over @ \$37.00 per 100 lbs.

Preparing Your Lawn Seed Bed

In preparing ground for a new lawn all that is necessary is to see that it is well spaded, making it as fine and mellow as possible. If it consists of earth from the excavation for the house, or is hard and lumpy, it should first receive a good dressing of Commercial Fertilizer, which should be spaded in and mixed with the soil, making it fine and smooth. Before sowing the seed, the surface of the soil should be freshly raked, then sow the seed as evenly as possible and rake it in, following with a roller.

The following quantities of the mixture we offer are the usual amounts sown for a new lawn: 1 lb., for 200 sq. ft.; 5 lbs. for 1000 sq. ft.; 10 lbs. for 2000 sq. ft.; 25 lbs. for one-fourth acre. If intended for renewing an old lawn use one-half the quantity.

1601 Shumway's Rockford Park Refined Lawn Seed Mixture

This is by far the best mixture of grasses for a fine textured lawn. It is made up of the choicest and hardiest varieties that will winter well and thrive under varying climatic conditions. It has been re-cleaned, compounded and blended as perfectly as modern machinery can do it. All of our grasses are analyzed by the seed laboratories and the degree of purity shows the elimination of practically all chaff and foreign seeds.

If we could compound a better lawn mixture we would do so, but through tests we fail to find its superior. **Postpaid, ½ lb., 28 cts.; lb., 50 cts.; 3 lbs., \$1.40; 5 lbs., \$2.25.** Not Prepaid, 10 lbs., \$3.85; 25 lbs., \$9.25; 50 lbs., \$18.00; 100 lbs., \$35.00; 200 lbs. and over @ \$34.00 per 100 lbs.

1603 Shumway's Rolling Green Mixture

A compounded mixture of quick growing grasses and White Clover that will make a quick show of green over the lawn. This mixture, however, is not one that will give the very fine texture of Shumway's Refined, but it will make a very creditable lawn and stand heavy usage when established. **Postpaid, ½ lb., 25 cts.; lb., 45 cts.; 3 lbs., \$1.25; 5 lbs., \$2.00.** Not Prepaid, 10 lbs., \$3.25; 25 lbs., \$7.75; 50 lbs., \$14.75; 100 lbs., \$29.00; 200 lbs. and over @ \$28.00 per 100 lbs.

1525 Bromus Inermis—Brome Grass

Bromus Inermis, (Smooth Brome Grass) is not a new grass but its value has just recently been rediscovered. It is a long lived hardy northern grass that withstands drought better than other grasses. It makes good hay of about the same quality as Timothy, but it is much more valuable for pasture either alone or with Alfalfa.

Alfalfa and Brome Grass. Recent tests at Michigan State College have shown that a mixture of Brome Grass and Alfalfa makes ideal summer pasture during the mid-summer season when it is needed the most. On light sandy soil in northern Michigan this mixture produced over a ton of hay per acre from the first cutting and good pasture for the balance of the season.

For this purpose 10 lbs. of Alfalfa and 5 lbs. of Brome grass seed are sown per acre either in the spring or in August. When sown alone, Brome grass is seeded at the rate of 20 lbs. per acre. It may be seeded with Oats, Barley or Wheat. The mixture of Alfalfa and Brome Grass gives best results when a good top growth is permitted before pasturing. Cattle will eat the Brome Grass in preference to the Alfalfa, giving the latter a chance to become well established. Sown in August it will be ready to pasture much earlier than if sown in the spring. **Postpaid, ½ lb., 30 cts.; lb., 50 cts.; 3 lbs., \$1.40; 5 lbs., \$2.20.** Not Prepaid, 10 lbs., \$2.15; 25 lbs., \$5.00; 50 lbs., \$9.50; 100 lbs., \$18.00; 200 lbs., and over @ \$17.00 per 100 lbs.

1551 Clover White Dutch For Lawns and Pastures

The famous pasture clover. Also used in lawns. Low growing, drought resistant and very nutritious. Adds greatly to pasture value. The seed is very small. 3 to 4 pounds sows an acre. One seeding lasts many years. May be sown in early spring on old pastures or with new seedings. In mixtures sow 1 to 2 lbs. per acre. Since it requires so little seed per acre the cost of using it is small. Use More White Dutch Clover. **Postpaid, ¼ lb., 30 cts.; ½ lb., 55 cts.; lb., \$1.00; 3 lbs., \$2.75; 5 lbs., \$4.25.**

1597 Shumway's Special Creeping Bent

Special mixture of domestic Bent Grasses. Your lawn, seeded with this mixture and properly cared for will be as beautiful as a putting green. For lawns it is better to use the seed than the Stolons, because the lawn will not grow so rapidly and the home owner can keep up with the mowing. Seed at the rate of 3 to 4 lbs. per 1,000 square feet. **Postpaid, ½ lb., 70 cts.; lb., \$1.25; 3 lbs., \$3.60; 5 lbs., \$5.75; 10 lbs., \$11.00; 25 lbs., \$25.00.**

1615 Timothy (45 lbs. Bu.)

Sow in Spring or Fall 12 lbs. per acre. As a crop to cut for hay, Timothy is probably surpassed by no other grass now cultivated. It is usually sown with other grasses about one-half to one-third of the above amount. Timothy Seed is one of my specialties. **Postpaid, ½ lb., 20 cts.; lb., 35 cts.; 3 lbs., 90 cts.; 5 lbs., \$1.40.** Not Prepaid, ¼ bu., \$1.25; ½ bu., \$2.25; bu., \$4.25; 2 to 5 bu. @ \$4.10 per bu.; 5 bu. and over @ \$3.95 per bu.

1618 Timothy and Alsike Mixture (45 lbs. Bu.)

The Greatest of All Pasture and Hay Crops

By far the best and cheapest seeding. On low-bottom, moist soils where other grasses fail, this will give perfect satisfaction, and on upland it's amazing what wonderful crops you can raise.

By experimenting it was found that Alsike and Timothy made a combination that was excellent and ahead of anything yet discovered for hay and pasture. They blossom and the seed ripens together and are suited to the same soils. On low, moist lands, where other grasses would fail, they do especially well. They do well on any land where common grasses and clover grow.

One great advantage that is realized by a mixture of these grasses is the fact that they are both perennials and make a better combination than most any other two. When you once get them established they stay right with you until you wish to break up the sod. They do not winter kill. Sow 10 to 12 lbs. per acre. **Postpaid, ½ lb., 25 cts.; lb., 40 cts.; 3 lbs., \$1.10; 5 lbs., \$1.70.** Not Prepaid, ¼ bu., \$1.70; ½ bu., \$3.15; bu., \$6.00; 2 to 5 bu. @ \$5.85 per bu.; 5 bu. and over @ \$5.75 per bu.

1531 Alsike, or Swedish Clover "Excel Brand" (60 lbs. Bu.)

Sow in spring. 8 lbs. per acre

Alsike seems to be especially adapted for the Northern States; it is a perennial clover and lives longer than Medium Red; it is also more hardy; in fact, it is the **hardest of all clovers**; it does not heave out of the ground in Winter and the severest cold does not injure it and it resists the extremes of drought and wet. It is the only clover that will **thrive on moist soil**, but it will also grow fairly well in stiff clays. It is mostly grown in bottom lands and quite often mixed with Timothy; these varieties seem to be well adapted for this soil and ripen at the same time. Postpaid, ½ lb., 35 cts.; 1 lb., 60 cts.; 3 lbs., \$1.65; 5 lbs., \$2.60. Not Prepaid, ¼ bu., \$5.75; ½ bu., \$11.00; 1 bu., \$21.50; 2 bu. and over @ \$21.35 per bu.

Sow 15 lbs. per acre in Spring or Fall

South of the Ohio River this wonderful annual clover leads them all for hay, for pastures and fertilizer. In the North sow in April, ready to cut and pasture July 10th. Not Prepaid, ¼ bu., \$3.00; ½ bu., \$5.75; 1 bu., \$11.00; 2 bu. and over @ \$10.85 per bu.

1599 Reed Canary Grass

Excellent for Pasture and grazing—makes 2 cuttings a season—yielding 5 to 7 tons per acre. A very valuable new perennial hay and pasture crop especially desirable for low, marshy land. Nothing like it has been thus far produced as it puts land that is just a dead waste into production of valuable forage. Continues to grow without care or attention. Very highly recommended by the Wisconsin and Minnesota Experiment Stations.

CULTURE. Sow in early spring, alone or with grain, 4 to 6 pounds of seed per acre broadcast, or 2 to 3 pounds with drill. Late summer and late fall seeding are also recommended. USE NITRAGIN ON ALL SOY BEANS—INCREASES YIELD—INSURES CROP

1709 2 bu. size, 30 cts.; 5 bu. size, 55 cts.; 25 bu. size, \$2.50, postpaid.

CULTURE. If planted with corn, 3 beans in each hill of corn is about right and this requires 3 to 5 pounds of seed beans per acre. If planted in drills to cultivate for hay or seed crop, rows may be 24 to 36 inches apart using $\frac{1}{2}$ to $\frac{3}{4}$ bushel of seed per acre. Rowing and cultivating, however, is not necessary. Thousands of farmers now are planting in solid drill, using a harrow and caring for large fields at small expense. Do not plant too early. Never before corn planting time. Always inoculate the seed before planting.

1649 New Mukden (100 Day Bean)

Late introduction by the University of Iowa. Here is a new variety of Soy Beans that has produced unusually large yields in Northern Indiana, Illinois and Iowa, many fields averaging as much as 40 bushels per acre. The Mukden usually has three beans in a pod. The pods start six inches from the ground. The plant grows about six inches taller than Illini or Manchu and matures about 10 days earlier. This is a yellow seeded variety which is the universal favorite as a market sort. Postpaid, 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts. Not Prepaid, $\frac{1}{4}$ bu., 90 cts.; $\frac{1}{2}$ bu., \$1.60; bu., \$3.00; 2 to 5 bu., @ \$2.95 per bu.; 5 bu. and over @ \$2.90 per bu.

1650 Illini Soy Beans (105 Day Bean)

Illini is a new variety developed at the Illinois Experiment Station from the old A. K. Has been grown now for several years. It has been constantly increasing in popularity. It seems to grow a little taller than Manchu, giving a heavier yield while in season it is a few days earlier. Just as desirable in every other way and we would say better for hay in Northern Illinois, Michigan or Wisconsin than Manchu. Has finer stems than Manchu. Postpaid, 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts. Not Prepaid, $\frac{1}{4}$ bu., 90 cts.; $\frac{1}{2}$ bu., \$1.60; bu., \$3.00; 2 to 5 bu., @ \$2.95 per bu.; 5 bu. and over @ \$2.90 per bu.

1651 Manchu Soy Beans (110 Day Bean)

This is by far the most popular Soy Bean in the middle west. It is a medium early variety, and it matures dry beans in about 110 days. The Manchu was almost unanimously considered to be the best of all Soy Beans for any purpose until the introduction of Illini. Seeds are yellow with a peculiar black seed scar. It is a 110 day variety, originally from Northern Manchuria. We recommend this variety for hay and silage, and as being one of the best to plant with corn for silage. Postpaid, 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts. Not Prepaid, $\frac{1}{4}$ bu., 90 cts.; $\frac{1}{2}$ bu., \$1.60; bu., \$3.00; 2 to 5 bu., @ \$2.95 per bu.; 5 bu. and over @ \$2.90 per bu.

The Best Early Varieties

1930 Shumway's Early White King

An extra early potato, remarkable for its drought resistance and its ability to mature heavy yields before the hot dry summer sets in. For an early potato it is noted for its keeping qualities. The white flesh has a delightful flavor and cooks mealy. It is almost round in appearance and produces uniform tubers. The skin is smooth and snowy white. It never seems to have blight and has no cores or black specks. Not Prepaid, $\frac{1}{4}$ bu., \$1.00; $\frac{1}{2}$ bu., \$1.55; bu., \$2.75; 100 lbs., \$4.45; 200 lbs. and over @ \$4.35 per 100 lbs.

In feeding value it is about equal to alfalfa; has no woody stem; holds its leaves well and produces a full crop the first season. A harrowing before sowing is the only preparation necessary. When sown alone broadcast 15 lbs. to the acre. Postpaid, $\frac{1}{2}$ lb., 25 cts.; lb., 40 cts.; 3 lbs., \$1.10; 5 lbs., \$1.70. Plant My Certified Seed Potatoes

CERTIFIED STOCK. The seed fields must be inspected at least twice while growing in the fields by an official State Inspector and again in the bin after being dug, and both times pass the necessary requirements. The fields must be sprayed for disease on the order of an official inspector. The stock must be practically 100% pure in type, must be free from late blight rot, blackleg, powdery scab, leaf roll, tuber moth, Sclerotium rolfsii Wilt, potato wart, ring rot, brown rot, and conform reasonably to the correct vine and tuber characteristics of the variety. The seed used in planting the crop must be proven certified seed of which a 100-lb. sample was grown in southern trials during the winter and passed the necessary requirements. Complying with all the above requirements, the potatoes are eligible for certification and are placed in official branded bags and sealed with official tags. Why gamble a crop on poor quality seed when certified seed is so reasonably priced?

Woodburn's Western Plowman

Woodburn's Western Plowman 120 Day Corn and One of the Best

Western Plowman is one of the largest and most dependable varieties of the large yielding sorts. It is extremely popular in the Southern part of Michigan, Indiana, Ohio, Illinois, Iowa, and in fact throughout the entire Corn Belt. It is one of the heaviest yielding and shelling sorts and extremely rich in feeding properties. The ears are 9 inches and over in length. Very uniform type. 18 to 20 rows of deep, golden, oblong kernels. The kernel has a slight cast of reddish brown. The stalks are large and leafy. Heavy rooting. Stands up exceedingly well, making it not only an excellent variety for producing a bumper crop of the finest yellow corn in cultivation but likewise a splendid variety for silo.

Murdock Yellow Dent (Wisconsin No. 13)

Murdock Yellow Dent was awarded sweepstakes for the Northern Zone, comprising the states of Wisconsin, Michigan, Minnesota, North Dakota and South Dakota at the National Corn Expositions and this in competition with corn of all varieties. Mr. H. C. Brueckner of Jefferson County, Wisconsin, was the exhibitor of this corn. He took more than 35 premiums on it in 12 years.

Murdock Yellow Dent is of a deep yellow color, ears 8½ to 9½ inches in length, hard and solid, just slightly rough and very uniform in type. It makes a large heavy growth of stalk and leaf and so is a good silage variety. Murdock is similar to Golden Glow but it grows a trifle larger both in stalk and ear and yields a trifle more.

Boone County White

One of the outstanding large yielding varieties of White Corn, producing on an average from 70 to 90 bushels per acre under favorable conditions. Ears 9 to 11 inches long with 18 to 22 rows. Grain very deep, slightly rough. Extremely attractive Corn both on the ear and shelled. Prize winner in many markets. 120 day corn.

Iowa Silver Mine

Identical in characteristics with Iowa Gold Mine. Recognized as one of the large yielding, drought-resisting varieties of White Corn. Especially suited for Central and Southern Corn Belt. Makes an ideal silage or fodder Corn.

Reid's Yellow Dent

Leading standard yellow variety originated many years ago by Mr. James L. Reid of Illinois who fixed a type that experts have failed to change for the better. In my opinion the most popular sort of yellow corn grown in the United States. I offer pure type of this leading standard variety, which is among the best all around purpose Yellow Dent Corn grown. **Description**—Color deep yellow, with lighter cap. Deep kernel, uniformly filled from butt to tip. Slightly rough, with grains dented on top. Leaves and stalks of Reid's Yellow Dent make the finest ensilage and fodder. Matures in 110 days. **Adapted**—Reid's Yellow Dent is adapted to central and southern portions of Iowa, Indiana and Illinois, Eastern Kansas and Oklahoma, Southeastern Nebraska, Missouri, Texas, Arkansas, Louisiana, Mississippi, Georgia, Alabama, Tennessee, Kentucky and Virginia.

Improved Leaming

The Leaming is the oldest distinct variety of corn, having been originated in 1826. It is a standard yellow corn, well adapted to northern and central Illinois and the most of Iowa, and similar latitudes. In fact, it is grown with success in southern Wisconsin and is in great demand in the north for silage. Not quite as large and not quite as late as Reid's Yellow Dent.

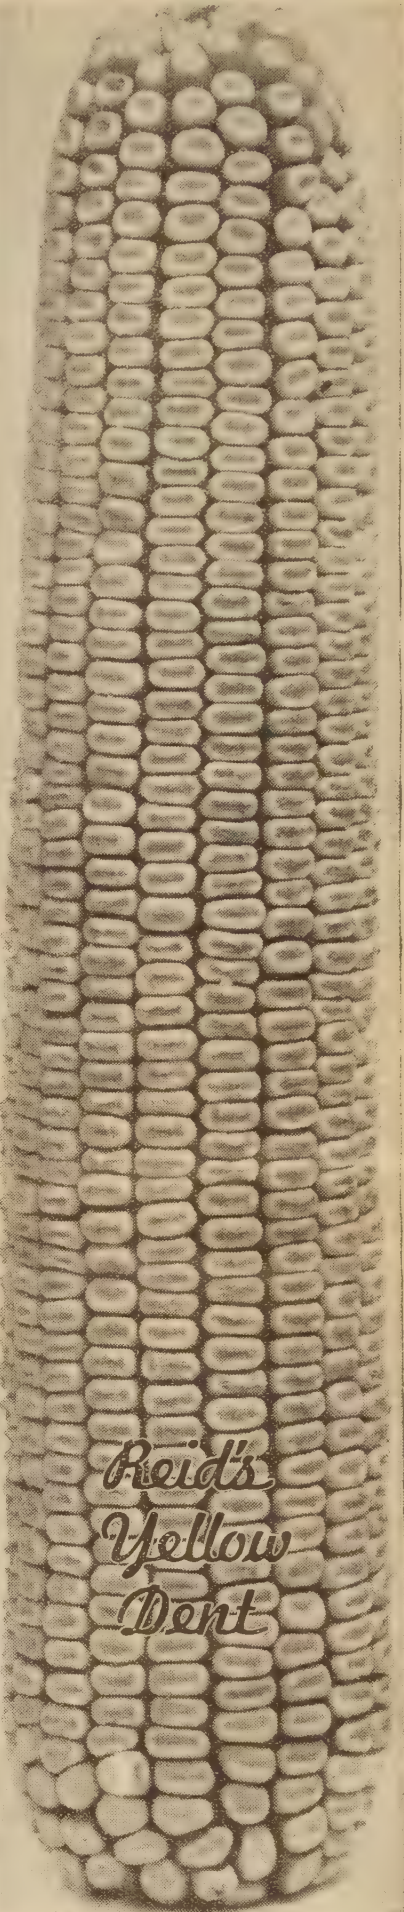

Iowa Gold Mine

Universal standard for years. I offer the pure strain Gold Mine, and recommend it. **Description**—With the expert corn farmer Gold Mine is known as medium early, between the 110 day and the extra early sorts that mature in eighty-five days. It is, however, a great producer and sure cropper. Ears are medium-sized and symmetrical. Color bright golden yellow. The grain is deep and the cob is small. For this reason it dries out quickly, producing sixty-two to sixty-three pounds of shelled corn to seventy pounds of ears. Stalks make excellent silage or fodder. **Adapted**—Iowa Gold Mine will grow in nearly every state in the Union, and is especially recommended for the Western corn belt. All throughout the Eastern States, where the climate does not demand an extra early variety, it is very popular. Has been tried all over the South with nothing but the best results.

Golden Glow

Golden Glow or Wisconsin No. 12

90 to 95 days. The outstanding corn for Wisconsin! Golden Glow is grown more largely in Wisconsin than any other variety of open pollinated corn. It is ideally adapted to all sections of the state, planting it as far north as North Central Wisconsin, and as it is early, it is a safe corn in an unfavorable season.

Golden Glow or Wisconsin No. 12 was developed at the Wisconsin Experimental Station. It is a beautiful, pure golden yellow corn, ears 8 to 9¼ inches long, 16 to 18 rowed, of symmetrical shape, well filled from butt to tip, with good sized kernels which are slightly rough on the outer end and entirely free from any tendency to flintiness. The stalks are about 7 feet high and very leafy, making it a splendid fodder and silage corn. Golden Glow is a splendid variety for both light and heavy soils, and is the best yellow dent corn for Wisconsin, up to the North Central Part, and for other states of equal latitude, Michigan, Minnesota, North and South Dakota.

Shumway's Goliath Silo or Ensilage Seed Corn

The World's Greatest Yields—Many Report 50 to 75 Tons Per Acre.

For many years I have worked on this World's Famous Ensilage Corn, Selecting and Reselecting Pure Bred Seed and today I feel safe in saying it leads all others in growth of fodder-producing stalks 18 to 22 feet high. The leaves are broad and long, they start forming at the lower end of the stalk and continue to the very top. It has a strong root system thereby not affected by wind or drought. I produce this seed South of the Ohio River and do not recommend it to ripen as far North as Rockford. It is solely a silo filler and one acre will produce more tons of feed than 5 acres of ordinary corn. If you desire hard ripe corn in your silo, plant one row of Goliath and one of native corn. That way you get maximum yield, maximum feeding value from minimum acreage. Plant a few Soy Beans in each hill—Makes a wonderful combination feed. Bushel of shelled corn contains 56 pounds.

1593 Canada Field Peas (60 lbs. Bu.)

Every season we get hundreds of letters from farmer friends asking that we suggest the best annual early hay crop. Well folks, there just isn't anything that equals a mixture of Canadian Field Peas and Oats seeded in the early spring at the rate of one bushel of each per acre. This combination hay makes an average yield of 2-18/100 tons of excellent feed per acre. Almost equal pound for pound with Clover hay. Relished by all classes of stock. Canadian Field Peas are very hardy; therefore may be seeded just as soon as it is safe to sow Oats. We prefer sowing with a grain drill although good results may be obtained by sowing broadcast. **Postpaid, 1 lb., 35 cts.; 3 lbs., 90 cts.; 5 lbs., \$1.25.** Not Prepaid, 1/4 bu., \$1.60; 1/2 bu., \$2.90; bu., \$5.50; 2 bu. and over @ \$5.40 per bu.

Plant 15 lbs. per acre in drills. **Postpaid, 1/2 lb., 15 cts.; 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts.** Not Prepaid, 10 lbs., 70 cts.; 25 lbs., \$1.45; 50 lbs., \$2.65; 100 lbs., \$5.00.

1592 Hegari

This is a sweet sorghum somewhat similar to cane. Very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of ensilage. Live stock, especially cattle, are very fond of it due to its sweet taste. For grain production drill like Kaffir 6 to 8 lbs. per acre. For hay drill in close rows at 75 to 90 lbs. per acre. **Postpaid, 1/2 lb., 15 cts.; 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts.** Not Prepaid, 10 lbs., 70 cts.; 25 lbs., \$1.45; 50 lbs., \$2.65; 100 lbs., \$5.00.

RAPE

1640 Dwarf Essex

A Quick, Profitable Crop—Thrives Everywhere

In the spring when you are sowing small grains, sow it at the rate of 4 pounds per acre with your grain. This will furnish valuable pasture after harvest. Plant it by itself at the rate of 5 lbs. per acre and see the immense yield of forage it will produce. After the last cultivation of corn sow 3 lbs. per acre broadcast. This is undoubtedly the most profitable place to sow rape seed. If you are hogging the corn down, the hogs will clean the rape as well as the corn. If you husk your corn and pasture the cornstalks, all kinds of stock eat it readily, and this gives them green food with the dry. **Postpaid, 1 lb., 30 cts.; 3 lbs., 75 cts.; 5 lbs., \$1.00.** Not Prepaid, 10 lbs., \$1.65; 25 lbs., \$3.75; 50 lbs., \$7.00; 100 lbs., \$13.50.

1625 Golden Beauty Millet

It has produced four to five tons of hay to the acre and from seventy to eighty bushels of seed. It may be sown on newly broken ground in the spring and as late as July. Leaves the ground in excellent condition for the following crop. Plant 30 pounds to the acre. **Postpaid, 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts.** Not Prepaid, 1/4 bu., 95 cts.; 1/2 bu., \$1.65; bu., \$3.00; 2 bu. and over @ \$2.90 per bu.

Spring Wheat

60 lbs. Bu. Sow
90 lbs. per acre

1664 New Marquis Beardless

The King of the Spring Varieties. Marquis is supreme. It outyields anything and everything in beardless wheat. By far the best variety for the corn belt.

This wheat has very stiff straw of medium height, which does not lodge easily. The heads are bald and quite heavy having smooth yellow chaff. The kernels are flinty, more round than those of other spring wheats, thicker and more plump, and of dark red color. **Postpaid, 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts.** Not Prepaid, 1/2 bu., \$1.45; bu., \$2.75; 5 bu. @ \$2.70 per bu.; 10 bu. and over @ \$2.65 per bu.

1516 Wisconsin No. 38 Barbless

Originated by the Wisconsin Experiment Station. Remarkably heavy yielding, producing over 70 bushels per acre. The very finest for malting purposes. Its smooth beards, resistance to hot weather and heavy yielding qualities make it the most outstanding variety. **Postpaid, 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts.** Not Prepaid, 1/2 bu., \$1.10; bu., \$2.00; 5 bu. @ \$1.95 per bu.; 10 bu. and over @ \$1.90 per bu.

1642 Rye—Mammoth Spring

(56 lbs. Bu.)

A Most Profitable Crop. Quite different from Winter Rye; highly valued as a catch crop. It is not only more productive, but the grain is of finer quality. Grows in any latitude. Straw is of special value as it stands 3 1/2 to 4 feet high, being better than that of Winter Rye and producing nearly four times as much straw as Oats. Produces 30 to 40 bushels of grain to the acre. As it does not stool like Winter Rye, not less than two bushels to the acre should be sown. **Postpaid, 1 lb., 25 cts.; 3 lbs., 60 cts.; 5 lbs., 85 cts.** Not Prepaid, 1/2 bu., \$1.35; bu., \$2.50; 5 bu. @ \$2.45 per bu.; 10 bu. and over @ \$2.40 per bu.

Buckwheat (50 lbs. Bu.)

1613 Sudan Grass

The Wonderful Hay Crop

One of the best annual forage plants ever introduced, suitable for almost any locality. Sudan Grass thrives best on rich loam, but has been successfully grown on almost every kind of soil, from heavy clay to light sand. Cold, wet, boggy soils are not suited to Sudan Grass.

Sudan Grass is a sorghum, and an annual, without underground root sprouts. It grows 4 to 5 feet high in drilled seedings, and 5 to 8 feet in cultivated rows. **Do not sow Sudan Grass before corn planting time.** Like corn, it is a warm weather crop. In favorable seasons, the growing period is long, and several cuttings can be obtained in one season. For hay it is ready to cut in 60 to 75 days, when it is in full head. It continues its growth, and in 40 to 45 days it is ready for another cutting.

Sudan Grass is an enormous yielder, producing 3 or 4 tons of hay at the first cutting. The second cutting is lighter, and the hay is much finer. Live stock of all kinds will eat the hay readily.

For hay, sow at the rate of 20 to 30 lbs. per acre, using a grain drill, and cover from one to one and one-half inches deep. Heavy seeding makes finer quality hay. **Postpaid, 1 lb., 30 cts.; 3 lbs., 75 cts.; 5 lbs., \$1.00.** Not Prepaid, 10 lbs., \$1.00; 25 lbs., \$2.10; 50 lbs., \$3.90; 100 lbs., \$7.50; 200 lbs. and over @ \$7.25 per 100 lbs.

1613 Sudan Grass

1627 Billion Dollar Grass

(35 lbs. Bu.)

All things considered, we call this the most valuable thing in our whole list of forage plants. We recommend it for the following reasons: First, it makes more hay than German Millet or any other. Second, although it grows so large, sometimes seven or eight feet high, the hay is of the most excellent quality, superior to corn fodder. Third, it is adapted to all sections and a great success wherever tried. It does well on low ground. Fourth, two crops a season may be cut from it, or, if left to ripen, it will yield almost as many bushels of seed per acre as oats. Plant 20 to 25 pounds per acre. **Postpaid, 1 lb., 30 cts.; 3 lbs., 75 cts.; 5 lbs., \$1.00.** Not Prepaid, 1/2 bu., \$1.25 bu., \$2.25; 2 bu. and over @ \$2.15 per bu.

1658 Speltz or Emmer (40 lbs. Bu.)

A valuable grain, closely related to wheat; the kernels, however, are tightly enclosed in the hulls or husk, and these adhere to the grain when it is threshed. It produces good crops even under adverse circumstances where other grain fails. It withstands more dry weather than any other grain, and produces more food value per acre than any other cereal, while it is a most valuable feed for all kinds of stock. It can be fed to horses, the same as oats, with the hulls on. Speltz can be grown on most any kind of soil, rich or poor, wet or dry, as it will not lodge like other grain because of the stiff and strong straw. Sow 80 lbs. per acre. **Postpaid, 1 lb., 25c.; 3 lbs., 60 cts.; 5 lbs., 85 cts.** Not Prepaid, 1/2 bu., \$1.25; bu., \$2.25; 2 bu. and over @ \$2.15 per bu.

SEED-OATS (32 lbs. Bu.)

1635 Columbia (Type)

Missouri State Experiment Station Development. Columbia is a strain of Fulghum, originated by the Missouri Station. Columbia Oats are recognized as one of the hardiest and most productive of the early varieties. The grain is brownish-gray color; panicle open, straw short and stiff. Farmers report unusual success in getting good catches of Red Clover when seeded with Columbia Oats.

1634 Iowar (Type)

Iowa State Experiment Station Development. A single plant selection from Kherson (Sixty-Day) made by the Iowa Station in 1910. First distributed in 1919. Slightly later than Sixty-Day; grain white, small, usually awned; panicle open; straw somewhat taller and stiffer than Sixty-Day.

1637 Gopher Minn. No. 674 (Type)

Minnesota State Experiment Station Development. Gopher is a white early maturing variety with straw so stiff and strong that it does not lodge even on well-manured farm land. It is also adapted for growing on peat land. It is without any question the best oats for the rich dairy farms of southern Minnesota, Iowa and Wisconsin.

1636 Improved Swedish Select (Type)

Wisconsin State Experiment Station Development. Considered by many to be the most valuable oats raised today. It possesses striking features, the grain is short, plump, white, and very heavy, under favorable conditions averaging about 40 pounds to the measured bushel. Owing to its great root development it stands very high for its drought resisting qualities.

1638 New Vanguard (Type)

This remarkable high yielding, rust resistant new Oat is a cross between Banner and Hajira and was originated by the Canadian Rust Research Laboratory, University of Manitoba. In checking the results of Vanguard Oats sown in the Central States last year, we find that it was the highest yielding variety at the University of Illinois trial plots at DeKalb, Illinois. In other plantings close to Rockford, it really stood at the top of the list in quality and yield. Some reports show yields from 75 to 160 bushels per acre but it is our judgment, based on experimental comparisons, that an average yield of 65 to 70 bushels per acre in this section of the country is about the top that you could expect.

1631 Milo-Maize

Forage Plant of Great Merit. Belongs to the Non-Saccharine Sorghums. It is pronounced the best and surest grain crop for dry countries and seasons, even better than Kaffir corn. It grows several smaller heads on side shoots, often as many as eight heads on a stalk. Very valuable for feeding stock, also one of the best poultry foods. Shumway's Glorious Zinnias

Zinnias are one of the most universally planted annuals. They are hardy and so easy to grow, doing well almost anywhere with little care. They offer many lovely colors, and their various types meet every garden need for beds, borders, and cut-flowers. Shumway's Zinnias are far superior to the old-fashioned Zinnias because they offer a wider range of delicate as well as rich colors, have much larger blooms, and are more handsome in shape. Zinnias flower profusely and continuously from midsummer to late autumn. For the finest double flowers, plant in a sunny location with good soil and plenty of water.

Giant Dahlia Flowered Type

You Can Grow Shumway's Luscious Mastodon Strawberries

like these in your own garden on a small patch of ground from my hardy vigorous plants. Try it.

Mastodon Everbearing

Grow your own strawberries at a cost of less than 1c a quart. Plant strawberries early. Some varieties make too many runners. Let only enough runners set to make 4 to 6 new plants to the square foot. This way you will get more and larger berries. My strawberries are grown only for the plants and not for fruit. This means you get only young, healthy, vigorous plants. Free Culture directions with each order.

3507 Shumway's Giant Everbearing Mastodon

The Most Delicious Large, Sweet, Tasty Berry in Cultivation. Produces Fresh Luscious Berries from June to November

Mastodon succeeds under practically all climatic and soil conditions, even producing large crops in dry climates. My thrifty plants set in the spring will produce a crop of berries in 90 days and continue bearing through summer and fall until stopped by freezing weather. Eighteen or twenty berries will often fill a quart box. They are rich, glossy red, of firm and solid texture and delicious flavor. A small planting will keep the home table supplied with berries throughout the summer and fall. A large planting will reap hundreds of dollars profit for the farmer. 25 plants, 83 cts.; 50 for \$1.28; 100 for \$2.10; 500 for \$7.65; 1000 for \$14.25, prepaid.

Hybrid Tea Roses

Popularly Known as Monthly or Everblooming Roses. In Bloom Almost Constantly from June until Frost.

3057 Mrs. Henry Bowles A new sparkling pink rose. Large, well-formed, high centered, very fragrant flower of an intense brilliant or warm shade of pink with salmon shadings. This is really a model Rose, perfect in every stage of development.

3040 Souvenir de Claudius Pernet Sunflower Yellow. A most vigorous grower of erect branching habit, beautiful long pointed buds of exquisite shape, carried on long, stiff stems. Very large, full beautifully-formed bloom.

3020 Betty Uprichard Unequaled in color by any other variety; its long pointed buds of rich Oriental-red tipped with carmine and suffused with a rich golden sheen expand to full double flowers of elegant form.

3047 Joanna Hill A New, Distinct, Beautiful Yellow Rose. The best yellow bedding Rose we have today. It is of clean healthy vigorous growth with abundant dark bronzy disease-resisting foliage and is a continuous free bloomer throughout the season. The good-sized buds are long and develop into full, double, very shapely flowers of a rich, deep, golden yellow, Indian yellow center surrounded by bold buff petals, sweetly scented.

3030 E. G. Hill A Great, Massive New Deep Maroon Rose. A new Rose produced on extra long stems, a rich deep velvety crimson of very large type, beautiful both in buds as well as in the fully expanded double flowers. Retains its brightness until the petals drop. Strong vigorous grower, delicately sweet scented.

3026 Los Angeles A Gorgeous Deep Pink. One of the most beautiful Pink Roses yet introduced. The long-stemmed flowers are of a luminous flame-pink, toned with coral and shaded with translucent gold at the base of the petals. The buds are long and pointed and expand to flowers of perfect form and rich fragrance.

3027 Kaiserin Augusta Victoria Hardest and Most Dependable White Rose. In color a soft beautiful pearly-white, tinted with just enough lemon in the center to relieve the white; shapely long pointed buds of good size, double, remarkably fragrant; beautifully formed flowers.

3042 Sunburst—Dazzling Color Apricot-yellow with orange center. Buds are long and pointed and borne singly on long stems. Open blooms are beautifully formed.

2993 Norman Lambert Here is our favorite of all yellow roses. Growth, vigorous, upright, bushy, and a profuse continuous bloomer. Bud large, long, pointed; flower large, double, high-centered, deep salmon-orange, shaded bronze and yellow, fading to yellow at base, reverse deep buttercup-yellow.

3033 Condesa de Sagato A new marvelously colored rose with large, cupped flowers of fiery coppery-red inside and rich yellow outside. It is one of the most striking roses of today. A strong, vigorous grower.

3025 Etoile de France Blackish Crimson. A big, strong growing variety, robust and rugged in every characteristic. The growth is heavy and the flower stems are strong and heavy, producing very little blind wood. It is free-growing and free-flowering, and the blooms are truly characteristic of the variety—big and double, and in color, a rich velvety crimson.

3037 Radiance Carmine Pink An Ideal Bedding Rose. The flowers, which are of splendid form, are a large and full type. The buds are particularly handsome in form and the full blooms large and double are highly perfumed. Radiance is rightly considered a leading Rose of the garden for cutting.

3038 Red Radiance—The Greatest Garden Rose The color is an even shade of clear red without a trace of any other color, retaining its vividness for an unusually long time after being cut. It is a remarkable bloomer.

3036 Mrs. Erskine Pembroke Thom Rich Golden Yellow. Full golden yellow scented bloom, deeper in center with orange splashing on back of petals. Blooms borne on long stout stems. Flowers large and of perfect form. Rich green foliage.

3029 Gruss An Teplitz Rich scarlet overlaid with crimson, wonderfully free bloomer. One of the hardest roses grown, of vigorous habit and producing a mass of gorgeous crimson roses on long stems. Thrives everywhere.

3024 Columbia Bright pink. One of the greatest bedding and cutting Roses of them all. Its beautifully formed buds are of a lively pink which becomes brighter and more intense as the bloom matures. Large and very free-flowering. There should be Columbia Roses in every collection.

Hybrid Perpetual Roses

They are distinguished for their hardiness and for this reason are largely planted in the North. While the main crop of flowers is borne in early summer, occasional blooms are produced late in the season.

3015 Paul Neyron. One of the best for outdoor culture. Probably the largest Rose in commerce, the flowers sometimes being six inches in diameter. Fragrant, clear pink blooms.

3017 White American Beauty (Frau Karl Druschki). This brilliant white type Rose has become renowned as the very highest type of its class and the best snow-white Rose ever introduced. It is an extraordinarily strong grower.

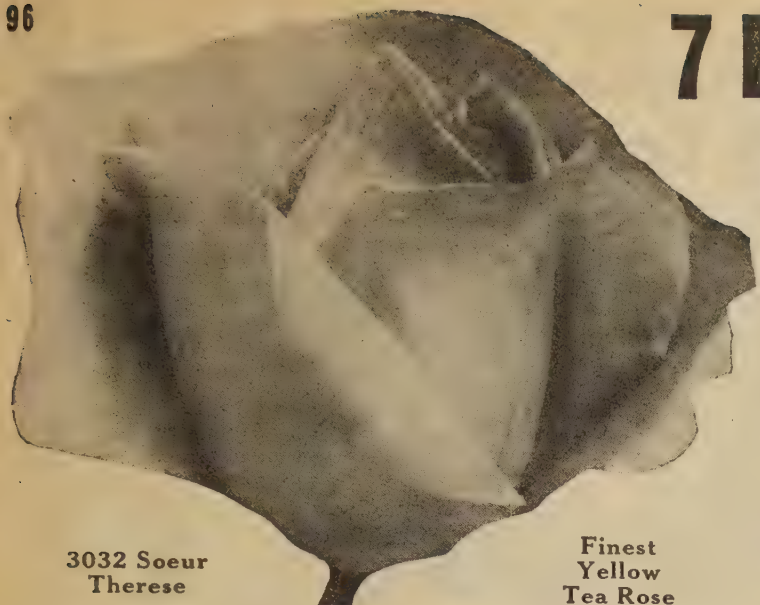

3016 Prince Camille de Rohan. Dark velvety purple-crimson, and doubtless the nearest "black" Rose in commerce.

3014 Gen. Jacqueminot. The popular hardy crimson "Jack" Rose. It is a strong, vigorous grower, entirely hardy; an early and abundant bloomer. Its brilliant crimson is the standard of color by which other Roses are judged; flowers full and fragrant.
